### **DETAILED ACTION**

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1648.

#### ***Response to Amendment***

The receipt of supplemental preliminary amendment of 11/26/2002, is acknowledged. Claims 1-5 have been canceled. Claims 6-22 have been added and are pending.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 6-14, drawn to process of producing temperature sensitive virus.

Group II, claim(s) 15-22, drawn to a vaccine of equine abortion virus.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special

Art Unit: 1648

technical features for the following reasons: The invention of Group I is known in the prior art as evidence by Osterrieder et al (Virology, 1996) wherein the reference teaches attenuated equine herpesvirus (see the abstract). The cited evidence prove that the technical feature of Group I does not make a contribution over the prior art. Thus, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
